FAQs

What's the learning curve of the product?

A person with no experience can be taught how to use Itsoclear in one day. There's minimal training for lab tech.

How do you prepare the repair to replace a clasp on an old partial?

Cut off the clasp, notch tooth and acrylic on lingual. Heat clasp into notched area.

How are clasps attached to the partials?

First create a loop with the tail of the clasps for retention, then embed and cover tail with acrylic.

What happens if you overheat the clasp?

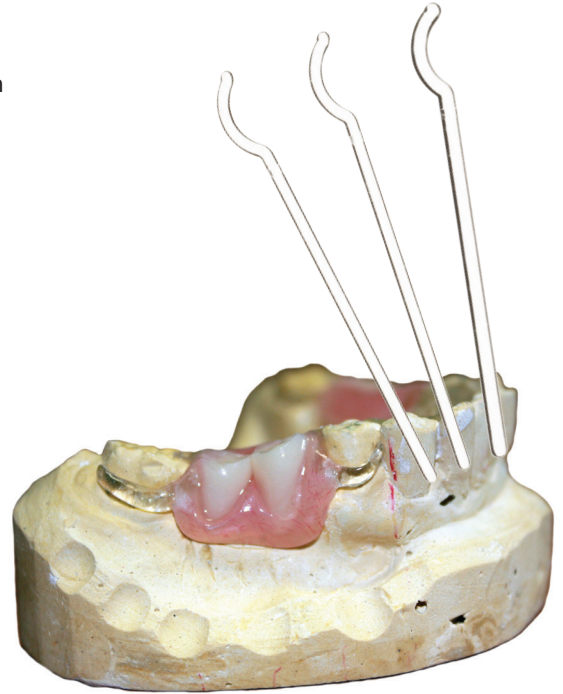

It will bubble, become brittle and break.

What is the most important thing to keep in mind with adapting a clasp?

Do NOT overheat the clasp.

How are black spots avoided in the mouth?

When applying acrylic, make sure you extend onto the inner proximal area.
