

Duz-All®

Duz-All is a PMMA methyl methacrylate all-purpose, self-curing acrylic repair material intended for any emergency.

About Duz-All®

Duz-All is intended for emergencies including: replacing broken teeth, repairing fractures, adding clasps, cold-cure full dentures, orthodontic retainers, rebasing and correcting full or partial dentures, adding a post-dam and appliances. It is perfect to use in a denture duplicator.

Sets in less than 20 minutes with no special equipment needed. Ideal for making or repairing jacket crowns.
